

SIMON WIKSTRAND

DIGITAL PRODUCT DEVELOPER

Kungälv, Sweden

+46 763 47 19 16

simon.wikstrand@hey.com

simonwikstrand.com

I've been working on building digital products since 2015 with my expertise as a software engineer. I've helped my clients move from an idea to reality. It can be a tool for your business to become more efficient, an online service that would bring benefits to your customers or even an product idea that you'd like to build a business around. I'm here to help you understand and build your vision.

WORK EXPERIENCE

CO-FOUNDER

Sourceomatic AB / Gothenburg, Sweden / 2018 - Now

 **Go, Vue.js, Postgres, Google Cloud, Kubernetes**

Sourceomatic is a legal-tech business that have developed a legal analysis tool named Konfidens to help Swedish public authorities to make the right demands on suppliers of IT-systems.

- <https://konfidens.se>

FULLSTACK DEVELOPER

Zimpler AB / Gothenburg, Sweden / 2019 - 2020

 **Go, React.js, Terraform, AWS, Elastic Container Service, Travis, Kafka, Docker, Typescript, Postgres, Webpack**

Zimpler is a fin-tech company that collect your card, bank and bill payments in one place. At Zimpler I built a web based backoffice system where customers could login and access their financial data, transaction history and administrate their accounts. Additionally I built backend services that handle currency transactions between bank accounts.

PROJECTS

PACERANK

2020 - Now

 [Go](#), [Vue.js](#), [Postgres](#), [Google Cloud](#)

In March 2020, I started to build an app during his free time that tracks how much time programmers put into different languages, editors and projects. It is currently in an early MVP stage, but is a good example of my ability to execute on an idea.

WORK EXPERIENCE

FRONTEND DEVELOPER

Happy At Work / Gothenburg, Sweden / 2018 - 2019

 [Vue.js](#), [Webpack](#), [Docker](#)

Happy At Work is a tool to measure employee happiness in an organization through surveys. At Happy At Work I rebuilt the administration interface for all customers where they could view statistics, start discussions with colleagues and send custom surveys.

- <https://www.happyatwork.io>

FULLSTACK DEVELOPER

SKF AB / Gothenburg, Sweden / 2018

 [Go](#), [React.js](#), [AWS](#), [Lambda](#), [Postgres](#)

At SKF I worked with building services that monitors health on ball bearings. When a ball bearing reached a faulty state, the system would alert staff to perform analysis.

- <https://evolution.skf.com/en/machine-health-monitor>

FULLSTACK DEVELOPER

Lösull I Väst AB / Gothenburg, Sweden / 2017

 [React Native](#), [React.js](#), [Postgres](#), [Go](#)

I helped Lösull I Väst to develop a regulatory app used by its employees to perform post-work regulation check. The application was built as an app in React Native for both iOS and Android. Additionally it had a web interface for administrative tasks.

- <https://www.livabisolering.se>

FRONTEND DEVELOPER

Forsman & Bodenfors AB / Gothenburg, Sweden / 2017

 [Vue.js](#), [Webpack](#), [Grunt](#), [Docker](#)

At Forsman & Bodenfors I build customized websites and tools for customers like Volvo, Volvia, Tanka and others.

- <https://www.inhouse.fb.se>

FULLSTACK DEVELOPER

MedFilm AB / Trollhättan, Sweden / 2016 - 2017

 [Vue.js](#), [Vuex](#), [Webpack](#), [Docker](#), [Docker Swarm](#), [Go](#), [MySQL](#), [Nginx](#), [Linux](#), [OpenVPN](#), [ECMAScript 6](#)

I helped MedFilm to develop a customer and content management system and a website that delivers 3D animated patient information videos to several hospitals in Sweden. The system included internationalization for content such as subtitles, film material and descriptions. It also built in a subscription model to enable customers to access content.

WORK EXPERIENCE

CO-FOUNDER

Queens Lab AB / Gothenburg, Sweden / 2017

I am a co-founder to the now successful consultancy business Queens Lab. We built the business around mixing design and technology. During this time I handled administrative tasks, recruited employees and found assignments.

- <https://queenslab.se>

CO-FOUNDER

Stidner AB / Trollhättan, Sweden / 2016

Vue.js, PHP, MySQL, Docker, XML, EDI

I joined Stidner as technical co-founder in the very early stage of it's life cycle. At Stidner we built an ecommerce checkout system that handled payments, inventory management and logistics. I built plenty of integrations with third party providers such as Stripe, Paypal, DHL, PostNord, Schenker and more.

FULLSTACK DEVELOPER

Västia Parkering AB / Gothenburg, Sweden / 2015 - 2018

PHP, MySQL, jQuery, Twig, Linux

As a solo developer I designed and built an administrative tool for parking management. The system handles monitoring, parking and co-worker administration. After the system was built in 2015. Since then I've performed maintenance and improvements during the span of 3 years.

- <https://vastiaparkering.se>

FULLSTACK DEVELOPER

Advertisecast / Remote, US / 2014 - 2015

PHP, MySQL, jQuery, Twig, Linux

As a solo developer I designed and built a marketplace for advertisement spots. The system has a login feature and would let advertisers put up their podcasts and list their ad spots. The podcasts could then be browsed by other agencies and companies that are looking for opportunities to advertise in podcast episodes.
